WRC

VETUS covers the distance with the WRC

The wireless 4-channel remote control

VETUS adds a remote for thrusters and winches to the line-up: the WRC! With the WRC wireless remote control unit you have total control over your boat, right in the palm of your hand. The set consists of a receiver (WRC) and remote control (WRCKF). The VETUS wireless control hand held remote has a range of 10 to 25 metres depending on the location of the receiver. This ensures easy control of bow thruster, stern thruster and/or windlasses, everywhere on your boat. You can programme up to two different items mentioned on the 4-channel remote.

Freedom to move while staying firmly in control

The WRC is competitively priced compared to the competition. For safety reasons VETUS recommends to install one fixed control panel like the BPAS next to the WRC. The WRC meets with EMC requirements, has a watertight remote and is directly available from stock.

Specifications WRC

- Power supply: 8 - 30 Volt D.C.
- Connectors for 2x VETUS thrusters (4 channels)
- Max. 10 remotes allowed
